TOOL KIT GUIDE

SPONGE is great to use slightly damp to rewet clay, especially in areas where clay is drying too quickly or starting to crack.

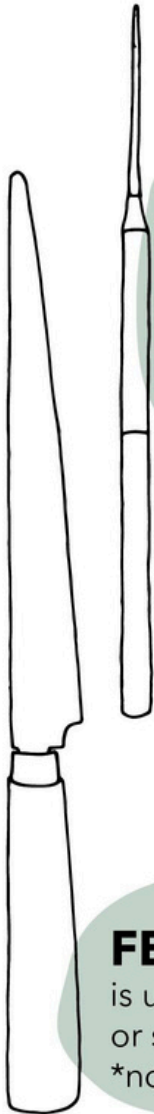

METAL RIB is used for finishing touches, fine-tune smoothing.

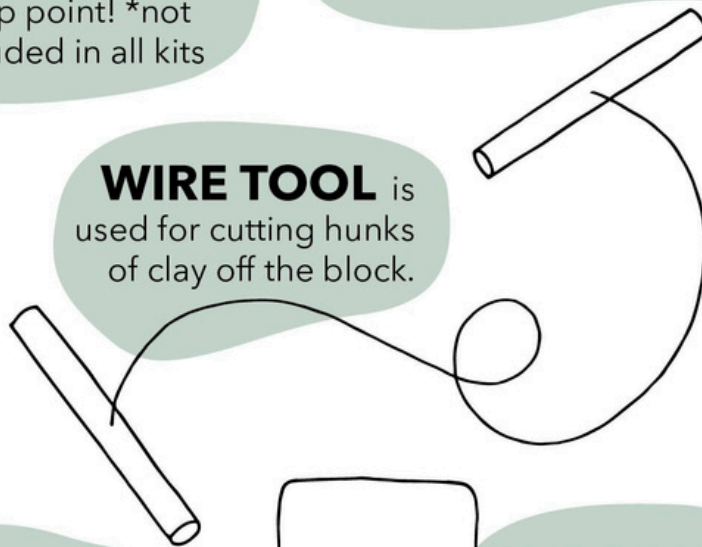

NEEDLE TOOL is ideal for drawing, writing, and scratching. Be careful of the sharp point! *not included in all kits

WOODEN KNIFE has two sides. The pointed side is great for cutting and larger line work drawing. The curves side can be used to compress seams.

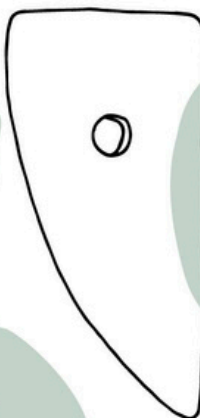

FETTLING KNIFE is used for cutting slabs or small parts of clay. *not included in all kits

WIRE TOOL is used for cutting hunks of clay off the block.

WOODEN RIB is used to smooth and compress clay. It also has a 90° edge, which can be used to help keep walls straight.

RIBBON TOOL is used to carve, make holes, hollow out thick areas of clay, or create pattern/texture.
